

Brainstorming Ideas:

<https://docs.google.com/document/d/15pydA1RMPcEHxO1npSQhTtZTChPtcg10AYHYDJj8Gs/edit>

Package Tracking Idea

- Where exactly is the package
- When did it load/unload from the truck

Webpage tracking friends (Stalk your friends!)

Simple mobile game that includes a high score list

Things to get done. List of tasks that could be updated as tasks are completed

- Possibly compare task completion with friends

Simple social media platform

Calendar app

Alarm clock with leaderboard (WHO SLEPT THE LEAST!!!)

Rate your friends! Social media score (Black Mirror Idea)

Regulating greenhouse conditions with hardware

- Humidity
- Temperature
- Water
- Fan speeds
- Remote access and control
- Notify when plants need to be watered. Notify when temperature goes above x
- 

Alexa based idea (possibly integrating with greenhouse)

- No front end or middle?

Nordic chip if we want to do more hardware integration
